# SWAP YOUR RUGGED TOKENS FOR

2ND CHANCE

DeFiat

Recycle Rugged Tokens

The advent of DeFi has led to incredible technological advancements. Unfortunately along with this development, the existence of exit scams and rug pulls has become common place. DeFiat wants to give you a 2nd Chance. Although your rugged tokens no longer hold value, DeFiat has created a new token called 2nd. Swap your old tokens for 2nd and then farm more in the Rug Sanctuary.
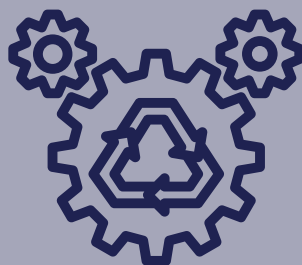

2nd Token

Users will swap there old tokens directly for 2nd. The amount of 2nd received will be proportional to the percentage of supply you owned in the dead token. If you owned 1 percent of the supply, you will receive 1000 2nd tokens. The qualified rugged tokens will be voted on by the community.

Farming 2nd

2nd offers users an unruggable, deflationary farming experience. 2nd keeps a variable fee, based on market buying and selling, that is charged on transfers. These fees are used to market buy 2nd and reward the farmers in the Rug Sanctuary.

The Process

1. After accessing the DeFiat Dashboard with your MetaMask, select the 2nd Chance tab.
2. Next you will select the dead token you wish to exchange in the drop-down menu.
3. Once selected, you will see the percentage of supply you own as well as the number of 2nd tokens you will receive in return. In order to make the swap, approve the recycle and then recycle again and you will receive your 2nd.
4. Now that you have recieved your 2nd you can head to Uniswap using the link provided and get UniV2 tokens in exchange for providing liquidity in the 2nd/Eth pool.
5. After receiving your UniV2 tokens, you can now farm in the Rug Sanctuary! Your rates will be increased significantly by holding DFT. The more DFT tokens you hold, the higher your yield will be.
